3. Scanning and decoding the paper CD	4
4. Decoding from a file	5
5. Uninstalling the application	6

1. Application installation

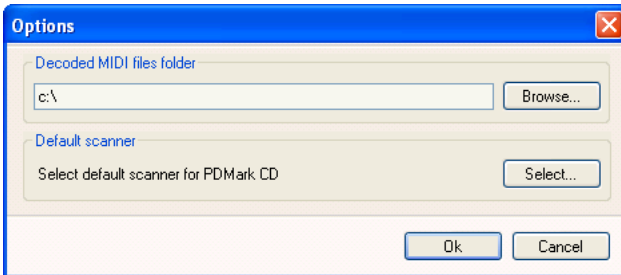

1. Before starting installation you need to have a scanner installed on your computer.
2. Insert the installation CD into the computer's CD-ROM/DVD-ROM drive.
3. Navigate to „PDMark Player“ folder and launch the installation program „setup.exe“.
4. Follow on screen instructions.
5. When the installation is complete, launch the application using its icon on the desktop or through the Windows Start menu.

PDMark Player application window

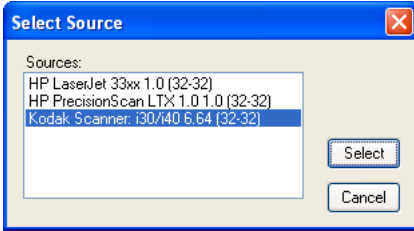

2. Settings

1. Click on Options top open the settings window.

2. Click on Browse and select the folder to write the decoded MIDI file to.

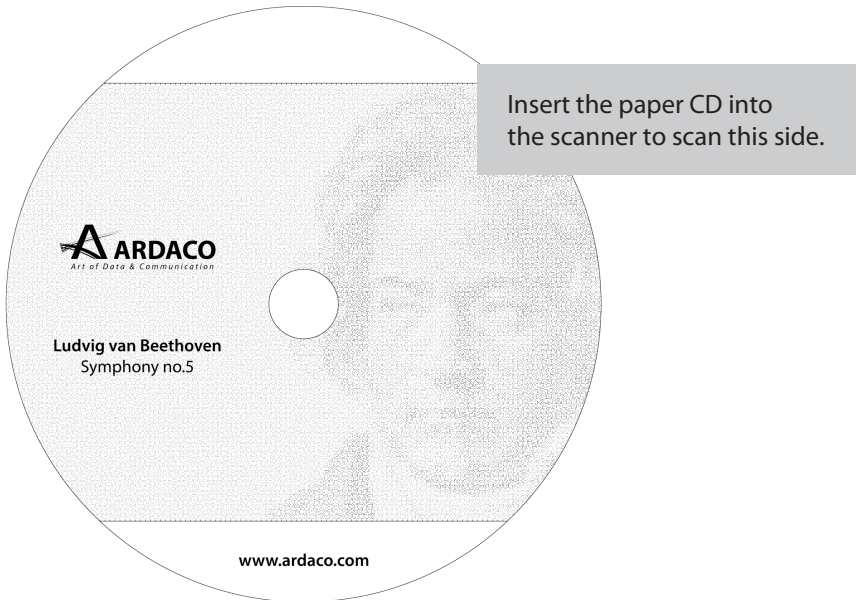

- Click on Select to display a list of the installed scanners. Select the required scanner and click on Select.

- Click on OK to store the settings.

3. Scanning and decoding the paper CD

- Insert the paper CD into the scanner in such a way that the side with the PDMark print will be scanned (i.e. the side showing Ardaco company logo, **not** the side with the accompanying text).

- Click on Scan CD.

- The Status field above the progress bar displays information about scanning and decoding.

- After the paper CD's contents have been successfully scanned and decoded, the Status field will display „Decoding done“.
- After the successful decoding of the MIDI file stored on the paper CD, the file will be automatically played. Click on ► (PLAY button) to play the file again or click on ■ (STOP button) to stop playing the file. The buttons are located to the right of the *Author* and *Song* fields.

4. Decoding from a file

- The paper CD can be scanned into a file outside the PDMark application (see the manual that came with your scanner).
- This file can be opened in the PDMark Player by clicking on Open file.
- Next the MIDI file will be decoded and played.

5. Uninstalling the application

To uninstall the application:

1. Go to Start > Control Panel > Add or Remove Programs.
2. Select PDMark Player and click on Remove button.
3. The application will uninstall.
